# Insulated exhaust valves

## Description

The KWI outlet valve is designed for mounting on ceilings, walls or directly on ducts with use of the special assembly frame RM.The KWI valve has a continuous adjustment of exhausted air by rotating central disc. Selected slot can be fixed by means of a fixing nut. Special construction of the valve ensures a low level of noise as well as easy and fast assembly.

Material: galvanized steel sheet Finishing: glossy powder painted acc. to RAL 9016 Standard colour: white

## Example identification Product code: KWI - aaa type

\* as standard without mounting frame included

## Technical Data

#### Parameters

Ød

Volumetric flow q (l/s or  $m^3/h$ ), total pressure loss  $P_t$  (Pa), and acoustic pressure level  $L_A$  (dB(A)), can be read from the figure.

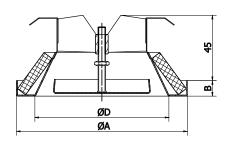

#### Pressure losses P<sub>t</sub>

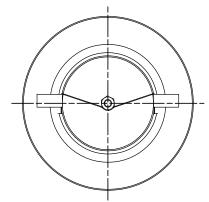

The figures show total pressure loss P<sub>t</sub> (Pa).

#### Acoustic pressure level, L<sub>A</sub>

The figure shows acoustic pressure level  $L_A$  (dB(A)). The noise level is specified for a room attenuation of 4dB, which translates into attenuation in the reverberation zone of the SABINE room with an acoustic absorption of 10 m<sup>2</sup>.
